

2-Year-Olds Home Learning!

Sort and Colour Drop with Duplo Lego

You can use any coloured blocks you have at home for this activity. This is a great way to teach colours to your child. Find a shoe box and cut out some shapes, colour around the shape with different colours and let your child enjoy posting the Duplo through the holes. You can extend this activity by asking your child to only post the green Duplo etc...

Mark Making on a Cardboard Box

I'm sure that many of you will have had a delivery or two while in the house so when you get a delivery why don't you save your cardboard box and see what your child can turn it into. It's also great for small world play, you can draw a road on it so your child can push cars on it or make it into a ramp for them to race the cars down.

Water Play - Toy Wash

A very handy activity in this current situation, your child will love the responsibility of washing their own toys and making sure they are nice and clean. They will also be developing muscle strength and coordination in their hands and wrists whilst using the sponges and washing-up brushes.

Matching Objects

Draw around some toys on some paper and then hide the toys around the room to see if your child can find them. Once all the toys have been found see if you can match up the toy to the drawing.

Paintsicles

Find a mould to freeze some paints in and add a lollipop stick to it. Once all frozen they should make a great picture when the children are mark making with them.

Cookie Cutter Stamping

A nice and simple stamp painting activity which is great to encourage language on colours and shapes. All you need is paint, cookie cutters and some paint.

Spaghetti Play

If you have got some spaghetti in your house and a colander it makes for a great posting activity which your child will love, and it is also great for their fine motor skills!
